

TEALGATE LTD.

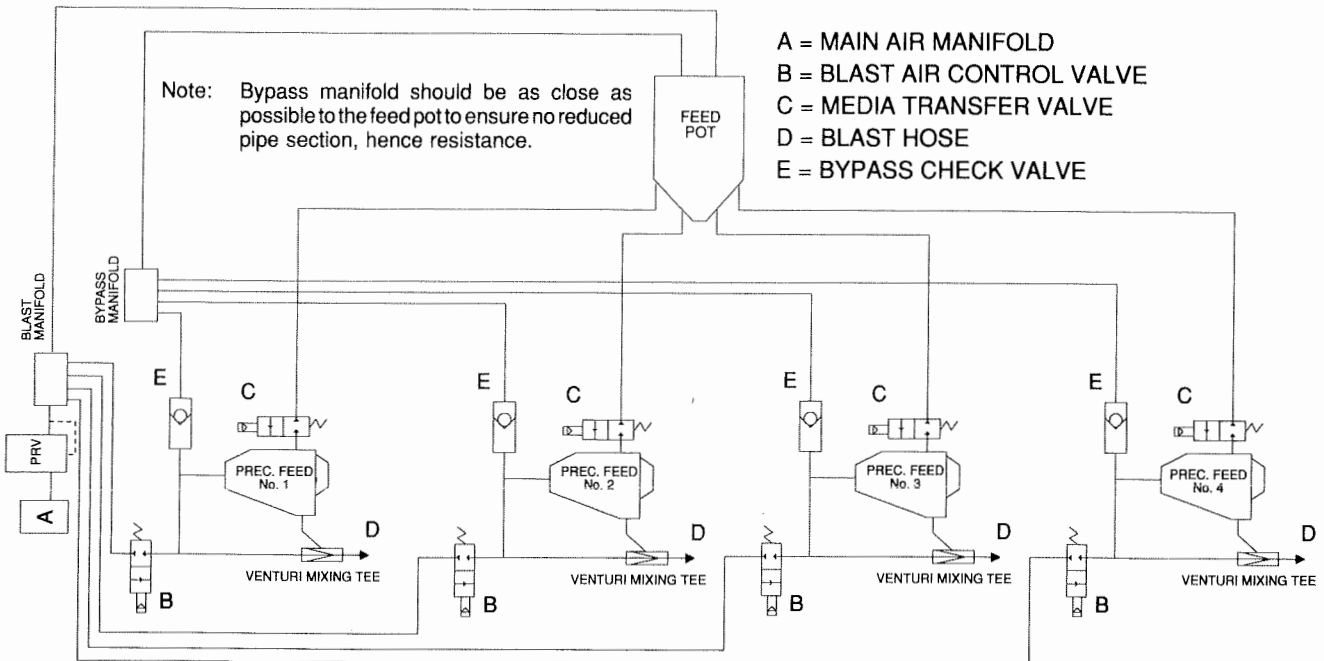

Announces New Dry Particle Precision Feeder

Ron John, managing director of Tealgate, Ltd., announced availability of the Model 920 Precifeed dry particle feed system. Intended for installations that require up to 20 liters/minute of feed rate, the unit is particularly suited to aircraft paint stripping PMB.

The unit is a micro-conveyor that works in conjunction with a variable speed motor for feed rates from 0.5 to 20 liters/minute. For additional information, contact
