

# From the Desk of JACK CHAMPAIGNE...

## It's Over

The 1991 Workshop, held in Atlanta, hosted 50 attendees for three days of operator training. We had Army, Air Force, Navy, automotive, aerospace, job shops. Next year's workshop will be at The Institute for Advanced Manufacturing Sciences (IAMS) in Cincinnati. Mark your calendar now.

## Boo

Paul Hansen didn't like my 2-piece Almen intensity "questionnaire". (see "Letters to the Editor"). Neither did Pete Bailey. Honest, guys, I was just saying, for a first guess at intensity this technique gives you a "ball park" idea of intensity. I wouldn't suggest using less than four strips for an intensity curve. In fact, you probably should use 10 or more. (For more Almen strips contact Pat at 219-256-5001)

## Visitors

We were pleased to host Frederic Jouet of Wheelabrator Alleverd (France) in December. Frederic is responsible development of New Applications and Technical Assistance. Besides being a (very large) supplier of shot and grit, they do extensive training and demonstration at their facilities in Le Cheylas, France.

## Technical Information

The long overdue Volume II of the Peening Reference Manual is finally available. Charts, graphs, tables, etc., a collection of facts and trivia. For a free copy circle Bingo 21. Got something to contribute? Please send it.

## Stress Profile Database

We have catalogued several hundred stress profiles. For a search and copy, call Pat at 219-256-5001. Got some profiles to donate to our collection? Please send it.

## NO - NOT AVAILABLE

We did not print extra copies of the Workbook. Sorry. Come see us in November in Cincinnati.

## Abstracts Now on Computer

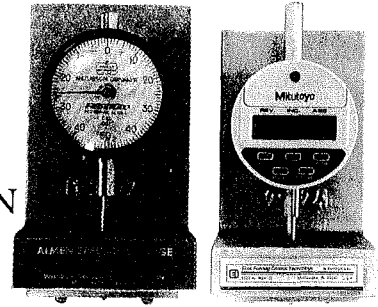

We now have abstracts for our library of articles on shot peening and related fatigue properties on computer. Give Pat a key word and we can search the data base in a few minutes and print out title and abstract. We have hard copies of many articles. Call Pat.
