From the Desk of...

Jack Champaigne

Thank you – All of the staff at The Shot Peener wants to wish all of our readers a happy and prosperous new year. We appreciate the support from our readers and our advertisers. Thank you all very much. We had fun in 1994. The 4th Workshop was a big success. We added over 500 new readers to the newsletter and we have several new advertisers. The industry looks healthy. All of the U.S.-based equipment manufacturers have strong backlogs of orders and Europe aerospace is starting to come back to life. All in all 1995 should be a good year for almost everyone."

Plan on ICSP - 6. Whether you plan to submit a paper and/or attend, mark your calendar for September of 1996 for the Sixth International Conference on Shot Peening, to be held in beautiful San Francisco, California, USA. Please contact me if you know of other journals or magazines where we can promote the conference. We want a large turnout. Help us make it the best one yet.

The Peening Reference Manual is being reprinted. This is an excellent collection of tables, charts, graphs, etc., on many aspects of shot peening. Please contact me if you have any material that might be included. This could include an “rules of thumb”, practices, procedures, fables, folklore, etc. Anything that might help someone setup a peening procedure would be appreciated.

Contact us on the Internet. See instructions on page seven. American Online, in an effort to attract new users, offers the first 10 hours free. Their low monthly rate allows 10 hours of connect time before charging for hourly usage. You can contact AOL directly, or circle Bingo No. 9 and we will send your name in for you. All you need is a computer with modem and Windows 3.1 or later. Sign up today... see you on the information highway.

SAE - Surface Enhancement. The next meeting of the Surface Enhancement Committee will be held on March 27-28 in LaConner, Washington. For more information contact Charlie Barrett at 908-536-3714 or circle Bingo No. 33.

SAE - AMEC meeting. The next meeting of the AMEC committee will be held January 18-20 in Pacific Grove, California. For more information contact Jay Pengra at Lockheed (Phone: 805-572-7943 or Fax: 805-572-5180) or circle Bingo No. 34.

*emoticon, symbol used on the Internet: Look at it sideways, it is a smile :)

Cleaning, etching, peening, surface preparation: ABB Raymond Blast Systems equipment does it all

The complete line of ABB Raymond Blast Systems surface treatment equipment includes everything from large automated custom systems to mobile vacuum type blasters. Uses all types of blasting media from steel shot for peening to fine, medium or coarse abrasives for cleaning, paint and rust removal. Systems capture dust and debris and recover media for reuse. Other ABB Raymond Blast Systems products include standard and modified blast cabinets, blast rooms, basket blasters, pneumatic recovery systems and original replacement parts and accessories. Call or fax for quick response information about the full line.
