It's over. And we had fun. In fact, some people had so much fun they wouldn't even tell us all of the details. I heard something about the "Blazing Pianos" that requires audience participation and one of our students was more than obliging. Unfortunately no one had a camera. Other activities heard were: go-cart racing (Dean Davis broke the cart), Poker, Jai Haligh, a visit to Church Street Station and a return to "Howl at the Moon Saloon", King Henry's Feast and many, many more. If you didn't have fun it was your own fault.

Four students took advantage of the student discount offered on Almen gages (so we didn't have to haul them back to Mishawaka). And, as usual, John Pekorski explained to the audience why the workshop was held in Orlando instead of Mishawaka. See reasons below.

The student roster is printed on page six to show the diversity of the companies sending students. Keep the roster to help convince your company that you should be there.

Mark your calendar now for next year, November 5, 6, 7, 1997 (place to be announced, possibly San Antonio, or Phoenix, or Santa Monica).

For more information see our web page “Workshop 96”. Ø

The Top Five Reasons Why the Shot Peening Workshop was Held in Orlando vs. Mishawaka

#5 Three words: Mishawaka, Orlando and November!

#4 Jack heard that orange juice helps fight fatigue!

#3 Florida permitted the evaluation of compressive stresses and Speedo bathing suits!

#2 Jack could act “goofy” without causing a commotion!

#1 Orlando was the only place that has more attractions than a Magna Valve!

Submitted by John Pekorski, Wheelabrator
Scenes from Workshop '96

"This is fun!"
Lou Perko, Elmer Rudico and David Graham.

"Dear Boss, I am working very hard..."
Paul Rudulescu

"Wake me when it's my turn."
Eddie Landron and Rick Johnston.

The workshop lab.

"Jack said what?"
Phil Karzhali demonstrating MagnaValves.

Just one more day!

We got tee shirts!

Walt Paluch works part-time selling books.
Tim Young and Mac Moore at the Pangborn hospitality suite.

"It was rough."

...and then you stack up the Tyler sieves...

Eddie Landron, Rick Johnston and Kevin O'Keefe

Nahum Leader, Dr. Mark Livshitz and Gad Dahan.

"We can do it!"

First, you zero the gage.

"Oh, that's what that does!"

Fred Danelli, Tiina Duncanson and Ken Dykstra

The Shot Peener  Volume 10, Issue 4
A Salute to Workshop Graduates

Several of our workshop graduates have kept in touch with The Shot Peener. Obviously they learned that all important question, “What’s the only thing you need to know about shot peening?” (The answer is 1-800-832-5653.) We enjoy hearing from the graduates. Sometimes they have problems (challenges). Sometimes they have success stories. But perhaps the most important thing is that they are striving to make improvements in the shot peening industry.

To show our appreciation, we want to list their names and company affiliations, and say “thank you”:
