At this site are heartwarming pictures for the American people (takes a while to download, but it's worth it).

○ **Asia Workshop 2001.** The first annual workshop in Asia, sponsored by *The Shot Peener* and *Metal Finishing News*, was a huge success. Students from Singapore, Taiwan, New Zealand, China and France were in attendance and 28 passed the Level 1 shot peening examination. Exhibitors were Baiker AG, Frohn, Walter Trowel, GT Baiker and Electronics Inc. The next special workshop sponsored by *The Shot Peener* and *Metal Finishing News* is planned in Germany in the Spring of 2002 and will be hosted by Peter Beckmerhagen of Frohn.

Participants at Asia Workshop 2001

○ **New Partnerships.** Electronics Inc. has partnered with 3M and Boeing to improve our training techniques on Roto-Flap Peening. We have agreed to work on specification revisions, video presentations and training materials.

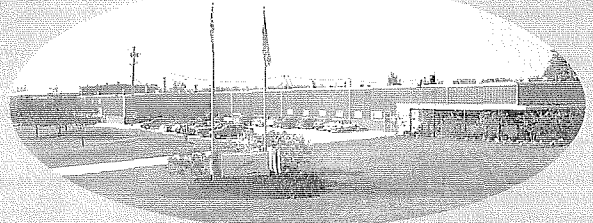

○ **Progressive Technologies.** I visited Northwest Airlines in St. Paul, Minnesota and was very impressed with the new robotic shot peening machine supplied by Progressive Technologies.

○ **Roger Simpson.** Roger Simpson, President of Advanced Materials Process Corporation in Wayne, Michigan died in a plane crash at the Osh Kosh airshow in July. Roger had written several articles on shot peening and presented papers at the International Conferences on Shot Peening. He will be greatly missed.

○ **Detroit Shot Peening Seminar.** EI is sponsoring a short workshop "Introduction to Shot Peening" for product design engineers in the Detroit area on November 19 - 21. These 2-hour sessions are intended to give a quick overview of the peening process, its possibilities and limitations. Recognizing that designers avoid shot peening whenever possible, this seminar will introduce resources available to the novice. Table-top exhibits will be made by Electronics Inc., Ervin Industries, Premier Shot, Frohn, Advanced Material Process Corporation, National Peening, Purdue University and Lambda Research.\* Cost is \$25 and is payable at the door. Advanced reservations are encouraged. Sessions are offered at 9:00 and 1:00 daily Monday, Tuesday and Wednesday.

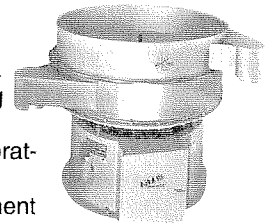

\* Participants are subject to change.

## Midwestern Industries, Inc. "The Sizing People"

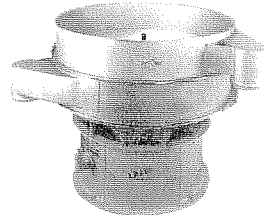

Midwestern Industries, Inc. headquarters, Massillon, Ohio

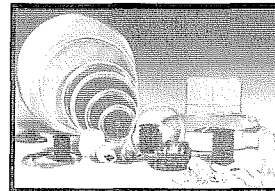

**F**ounded in 1952, Midwestern Industries, Inc. is a leader in designing and manufacturing both round and rectangular vibrating screening equipment, round separator replacement screens and parts, electric screen heating products for use on rectangular vibrating machines and a weaver of industrial wire cloth for replacement screens in both round and rectangular vibrating screening equipment.

ME model external drive or MR model internal drive separators

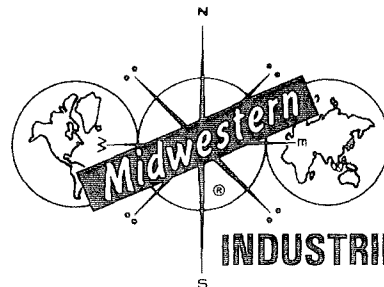

In the screening industry we are known as "The Sizing People" because we devote 100 percent of our time to solving tough screening problems. Meeting the needs of the screening industry has always been our only business.

At Midwestern Industries we do business the old fashioned way—we service it. We are proud

of our long standing reputation for service, on-time delivery and technical assistance. If you need emergency replacement screens or parts, we do whatever it takes to keep your plant up and running, including weekend production and same day shipments.
